TRADE PRESS RELEASE

POWAKADDY SALES PERFORMANCE MIRRORS RECORD BREAKING MONTH

Market leading electric trolley brand reports sales figures in line with the best in the company's history

PowaKaddy, the #1 name in powered carts, is reporting some very strong sales numbers with units sold during the month of June virtually replicating the same period in 2007; the biggest ever sales month in the company's history. Indeed, the market leading brand recorded the greatest number of shipments in a 10-day period during the end of June and the trend is continuing during July.

PowaKaddy's success this season has been built on the continued high demand for the world's best selling cart, the Freeway; a franchise that continues to outsell the rest and sets the benchmark in electric trolley design.

Simon Homer, PowaKaddy's Sales Director is delighted that the sales performance has maintained its momentum 12 months on from its record breaking display: "To mirror our achievement from June of last year is incredibly satisfying given the current economic climate. It is recognition of all the hard work everyone is putting in at PowaKaddy, whilst once again highlighting the staying power of the Freeway."

With the iconic Freeway combined with a whole raft of exciting new product developments planned for the not too distant future, PowaKaddy continue to lead the way in the electric trolley market.
